

Determine whether a statement is ALWAYS, SOMETIMES, or NEVER true.

1. Two right angles are congruent.
2. An acute angle is congruent to a right angle.
3. Two lines intersect to form vertical angles.
4. Vertical angles are adjacent to each other.
5. A right angle is a vertical angle.
6. Two lines intersect to form adjacent angles.
7. Vertical angles are congruent.
8. Two congruent angles are also vertical angles.
9. The two angles in a linear pair are adjacent to each other.
10. The two angles in a linear pair are vertical.
11. Two adjacent angles are both acute angles.
12. Two angles of a linear pair are both acute angles.
13. Two angles of a linear pair are both obtuse angles.
14. Two angles of a linear pair are both right angles.
