

Math 1

Rewrite the equation from standard form into slope-intercept form.

1. $5x + 6y = 36$

2. $4x - y = -28$

3. $6x - 7y = -56$

4. $2x - y = -6$

5. $x - y = 0$

6. $8x + 3y = -9$

7. $2x + y = -9$

8. $11x + 7y = -21$

9. $7x - 6y = 6$

10. $x + 3y = 6$

11. $2x + 5y = 6$

12. $x - 8y = -24$

13. $x - 5y = 35$

14. $11x - 4y = -32$
