KEY

Solve a system of linear equations by substitution. Determine the simplified form of the equation you get from this substitution.

1. $x = 3$

2. $4x = 0$

3. $x = -6$

4. $x = 8$

5. $6x = 12$

6. $11x = 33$

7. $9x = -9$

8. $8x = 32$

9. $x = 1$

10. $12x = -24$

11. $x = 3$

12. $x = 7$
